Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-4,41-45,56-58, drawn to a digital jukebox, classified in class D14, subclass 496.
 - II. Claims 5-40,48-55,59-60, drawn to information storage and retrieval, classified in class 711, subclass 111.
 - III. Claims 46-47, drawn to bit allocation subband processing , classified in class 704, subclass 500.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions of group I, digital jukebox, is the storage and retrieval of sound information to be presented to the user, classified in D14, subclass 496; whereas group II, pertaining to generic digital information storage and retrieval, is classified in class 711, subclass 111.
3. Inventions I and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different

functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions of group I, digital jukebox, is the storage and retrieval of sound information to be presented to the user, classified in D14, subclass 496; whereas group III, pertaining to bit allocation and subband processing (as in MPEG type formats and processing), is classified in class 704, subclass 500.

4. Inventions II and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions of group II, pertaining to generic digital information storage and retrieval, is classified in class 711, subclass 111; whereas group III, pertaining to bit allocation and subband processing (as in MPEG type formats and processing), is classified in class 704, subclass 500.

5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

6. A telephone call was made to Mr. Frank DeRosa on 9/14/2004 to notify applicant regarding the above restriction requirement; which did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
